DETAILED ACTION

Claims 1-8, 10, and 12-34 are pending.

Drawings submitted on 4/19/2002 are accepted as formal drawings.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Ortega (Reg# 50,554) on 13 March 2006.

The application has been amended as follows:

Claim 1. A security system for controlling access to encrypted information, comprising:
a hardware device for storing at least one decryption key for use in decrypting an encrypted item of information, the decryption key being associated with a security code which is used by the hardware device to determine whether it is authorized to send encrypted copies of the decryption key to others, wherein if the hardware device is authorized to send an encrypted copy of the decryption key, it encrypts the decryption

Art Unit: 2134

key and propagates the encrypted copy of the decryption key, wherein each time the hardware device propagates a decryption key, it includes as part of the decryption key an identifier indicating the identity of a sender's key, and wherein a user can append a control word against their identity in the decryption key to instruct the hardware device to initiate a message to them or an agent informing them of the propagation of the key and giving information concerning that propagation.

2. Claims 1-8, 10, and 12-34 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

4. With regards to claims 1-8, 10, and 12-17, the cited prior art fails to teach or suggest the appending of a control word against their identity in the decryption key to instruct the hardware device to initiate a message to them or an agent of the propagation of the key and giving information concerning that propagation. As such, the cited prior art fails to anticipate or render obvious the above-cited claims.

5. With regards to claims 18-34, the cited prior art fails to teach or suggest the a security code associated with an encryption key that includes a group code as an indication of an acceptable range of recipients to determine whether it is authorized to send encrypted copies of the decryption key to those recipients. As such, the cited prior art fails to anticipate or render obvious the above-cited claims.
